Structure

Wood is an organic living material that responds to different humidity and temperature changes. Therefore, the construction of parquet flooring is very important to ensure maximum stability and durability.

2 LAYER PLYWOOD STRUCTURE

1 — Protective finish. 5 layers of UV hardened lacquer or 3 layers of UV hardened oil.

2 — Top layer. 3/4/5/6 mm oak

3 — Protective finish. 5 layers of UV hardened lacquer or 3 layers of UV hardened oil
Backing layer – water resistant birch plywood

4 — 2/4 side bevel, TG4 (tongue and groove 4 side)
